

OLD ERA

NEW ERA

THE ERA HAS CHANGED

ADAPTING TO AI IS NOT OPTIONAL

STAY AHEAD

LEARN AI. BUILD INCOME.

Practical | Non-Technical | Applicable for Everyone

AI is changing every industry.
The right skills can open doors to better jobs,
your own business, or quick income.

**The question is – will you use it,
or be replaced by it?**

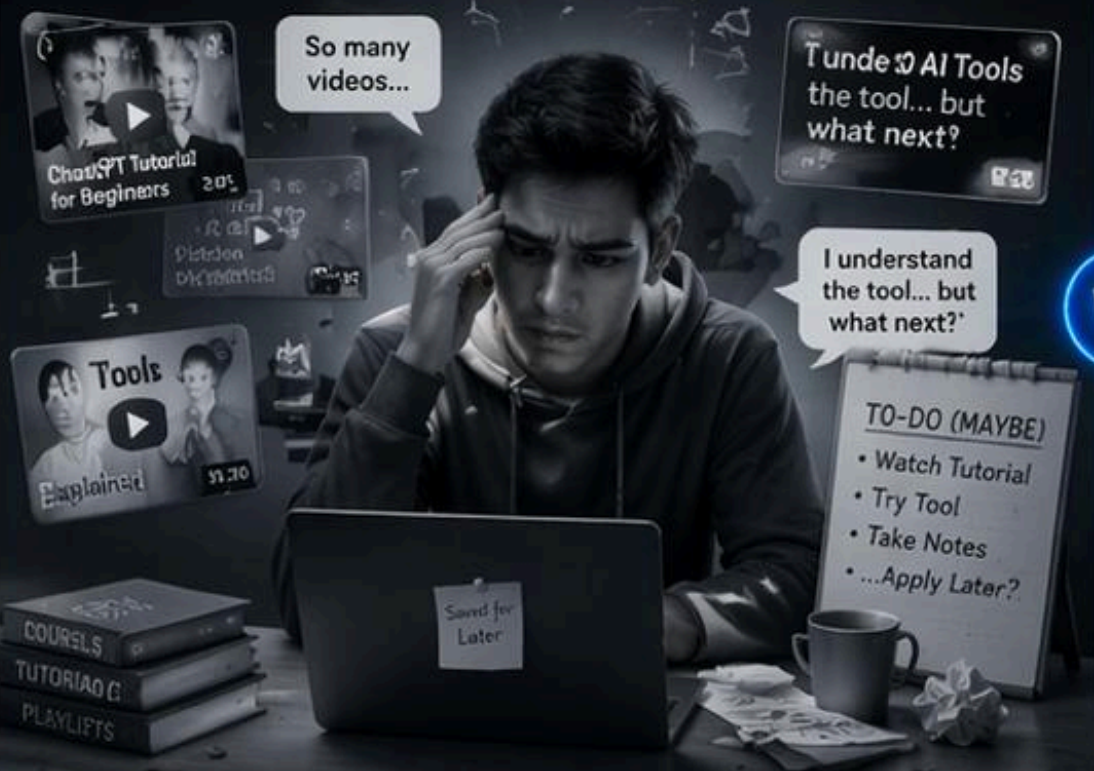

It's Not the Era of AI LEARNING Anymore. IT'S THE ERA OF APPLIED AI.

Built for REAL PEOPLE. REAL SKILLS. REAL RESULTS.

KNOWING AI DOESN'T CHANGE YOUR LIFE. USING IT DOES.

AI LEARNING (THE OLD WAY)

FOCUSSED ON KNOWLEDGE, NOT OUTCOMES

VS

APPLIED AI LEARNING (THE KIMB WAY)

FOCUSSED ON APPLICATION, INCOME & IMPACT

THE PROBLEM

- Information Overload
- No Clear Path
- No Practical Use
- No Accountability
- Slow Progress

THE RESULT

You keep learning... but never earning.

RESULT

You don't just learn AI. You use it. You earn from it. You grow because of it.

REAL POSSIBILITIES

Most learners start earning within 30-60 days of applying AI skills.

THE DIFFERENCE IS SIMPLE

AI LEARNING

Gives you knowledge.

APPLIED AI

Gives you results.

AI LEARNING

Collects information.

APPLIED AI

Creates income.

AI LEARNING

Feels overwhelming.

APPLIED AI

Feels empowering.

STOP JUST LEARNING. START APPLYING. YOUR FUTURE WON'T WAIT.

- ✓ Real Results

Learning with Direction. Growing with Purpose.

On-line learning is self-driven.
Off-line Learning is System Driven.

- Only 5-15% of learners complete online courses.
- Over 70% of learners don't apply what they learn online.
- Average attention span in self learning drops drastically without accountability.
- Less than 10-20% of online learners convert skills into income.
- Millions of AI tutorials exist online that leads to confusion, no direction, and no progress.

KIMB AI School

- Accountability: You show up – you learn – you apply.
- Clarity: No confusion – structured path.
- Real Time guidance: doubts solved instantly.
- Environment: You are surrounded by serious learners.
- Execution Focus: Not just learning - doing.

AI can be learned for free.

But clarity, structure, and results don't come free. In a world full of AI courses, we give you a clear path to use AI.

What FREE / ONLINE AI Courses Actually Teach.

Reality Check

Basic AI Concepts (Theory-heavy)

What is AI, ML, Deep Learning
Neural networks, models, algorithms
How AI works internally

Reality:

Most courses start here and stay here.
Example topics:
Machine learning basics
NLP, computer vision
Model training & evaluation

Coding-Based AI (Not beginner friendly)

Python programming TensorFlow, Keras
Data science & analytics

Reality:

Requires math + coding background.
Others get lost and drop out here.

Example:
Google ML Crash Course teaches algorithms, overfitting, etc.

Prompt Engineering (basic level)

How to use ChatGPT
Writing prompts

Reality:

Surface-level only
No real-world earning application

Example:
Prompt writing
AI usage basics
AI fluency skills

Business / Marketing AI (very generic)

AI in marketing
Automation
Chatbots

Reality:

Theory + examples
No actual execution training

Example:
Social media automation
Customer experience tools.

AI Tools (but unstructured)

Image generation
Video AI
Chatbots

Reality:

Random tools, no system
No roadmap → confusion

Example:
ChatGPT usage
AI image/video creation.

**IF TOOLS ALONE WERE ENOUGH...
EVERYONE WATCHING YOUTUBE WOULD ALREADY BE EARNING.**

In a world of online confusion, we give real-world guidance

Feature	Free / Online Learning	KIMB AI School
Clarity	Too many options, confusing	Clear step-by-step path
